I WOULD LIKE TO MAKE NOTE HERE: TO CHECK WITH MULTIPLE SOLAR PANEL TO CALCULATE MTTP SO VERIFY HOW IT BEHAVES....

R_{OV1} and R_{OV2} Determine the (Termination Voltage) $VBAT_{OV} \approx 3.86V$
 R_{OUT1} and R_{OUT2} Determine the output voltage. ($\approx 2.280V$) $8F$ MIN $2.2V$
 $VBAT_{MIN} = 1.21 \times (1 + R_{OK2} / R_{OK1}) = VBAT_{MIN} \approx 2.34 V$
 $VBAT_{MIN_HYST} = 1.21 \times (1 + (R_{OK2} + R_{OK3}) / R_{OK1}) VBAT_{MIN_HYST} \approx 2.48 V$
